Salzer's EARLIEST OF ALL TOMATO

The Leading Extra-Early Tomato!

Earliness in tomatoes is essential for the market grower and highly desirable for the home garden! We believe Salzer's Earliest of All is the best extra-early tomato so far produced; it is our very earliest strain; it is a "short season" tomato. Ripening in about 57 days, after setting out the plants, it is especially adapted to all sections of the country, which makes it so decidedly popular. Finely bred for uniformity in size, attractiveness, extra earliness, and trueness to type, Salzer Quality is nowhere better evidenced than in this fine, highly praised variety. If you want the very earliest tomatoes, combined with fine flavor, meatiness, productiveness, attractiveness, and tenderness, you should plant Salzer's Earliest of All Tomato. It is bound to please the most particular.

The fruits are of good size, brilliant scarlet color, nearly round, entirely smooth, and remarkably handsome. The flesh is solid, and of the finest flavor. The tomatoes are borne continuously in large numbers until killed by frost. They have a tough skin, firm flesh, making them good shippers and keepers.

Price of Salzer's Earliest of All Tomato:
1118—Pkg., 15c; ½ oz., 42c; oz., 77c; 2 oz., \$1.40; ¼ lb., \$2.60, postpaid. See Page 21 for Tomato Plants.

With us in the North it has always been a study to produce extremely early vegetables, that will ripen and produce perfect fruit in a short time, and in Salzer's Earliest of All Tomato our efforts have been unusually successful. Everybody who has tried it speaks of it in highest praise.

Salzer's Sensational, New, Heavy Yielder, Early

Notice Its Seven Faint Lobes

SALZER'S *Sensational* TOMATO

Offered for the first time this year, and obtainable only from Salzer's! Salzer's Sensational is a tomato of surpassing excellence. It has earliness, solidarity, perfect smoothness, large size, and it is a tremendous yielder! We believe it will eclipse any early tomato grown today.

Mr. Wm. E. Vail

Salzer's Sensational was developed by Mr. William E. Vail, Yorktown Heights, N. Y., who has given the United States some very fine introductions, about the finest of which is this superb tomato. The cool summer and cloudy days of 1945 retarded tomatoes, but Salzer's Sensational came through well and outyielded all other varieties! Seed was planted at Cliffwood Farms on June 6 and the first tomatoes were picked on August 25,—81 days from seed to ripe fruit! The tomatoes are red, with firm flesh, meaty, smooth, and of sub-acid flavor. The yield is tremendous. One characteristic is the shape, the tomatoes having seven more or less indistinct lobes or ridges, which enhances its appearance. Fine for tomato juice. Seed short this year.

1121—Pkg., 50c, postpaid. Limit, two to a customer.

SOW SALZER'S SEEDS

Your Mixed Dahlias gave me a big surprise. Some measured 7 1/2 inches across. They were beauties.—Mrs. Walter Ward, St. Vincent, Minn.

New! **SALZER'S** *Slobolt* *Lettuce*

A brand new leaf lettuce offered for the first time this spring! Slobolt was developed by the U. S. Dept. of Agriculture, Beltsville, Md., and is what its name indicates—it is slow to bolt to seed!

Slobolt is the result of ten years' breeding and selection work at the Beltsville Station, to produce a lettuce that would develop well in hot weather without shooting quickly to seed.

Slow to Go to Seed

It withstands the hot summer weather without going to seed, two to three weeks longer than Black Seeded Simpson, Grand Rapids and Prizehead Lettuce! If plants of Slobolt are set 10 or 12 inches apart and only the basal leaves used as they grow large enough for table use, lettuce may be had from the same plant for several weeks, making Slobolt a most desirable home garden variety. And, making it equally valuable for the trucker.

Slobolt has attractive light green leaves that are savoyed and frilled, and is of deliciously tender, crisp quality. You will like it immensely. The seed is black. Seed supply limited this year.

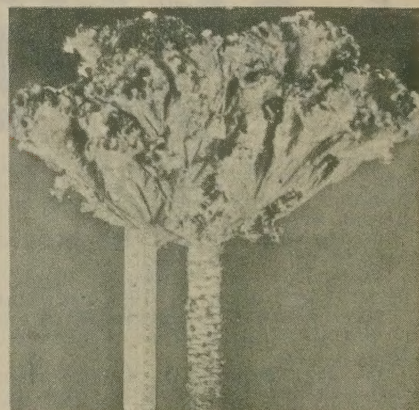

542—Pkg., 20c; 2 pkgs., 35c; ½ oz., 34c; oz., 60c; 2 oz., \$1.12; ¼ lb., \$1.95, postpaid.

**SLOBOLT
LETTUCE**

Notice

how slow it is to go to seed, and how the leaf whorls develop as the stalk becomes elongated, permitting the basal or bottom leaves to be used over a long period.

SALZER'S *New!* *Badger* **EGG PLANT**

A brand new Egg Plant from the Wisconsin College of Agriculture, Madison, Wis. Badger State is six to seven inches long, slightly smaller than Black Beauty, and is an attractive light purple color. Contains fewer seeds, which ripen slowly and thus are not objectionable in the older fruits. Badger State Egg Plant is especially desirable for its earliness. Matures in 78 days. Is the earliest of all egg plants, and this with its yield and its excellent quality, make it about the finest egg plant grown today!

493—Pkg., 20c; 2 pkgs., 35c; ½ oz., 54c; oz., 98c; ¼ lb., \$3.45, postpaid.

Salzer's

EARLY BIRD

Radish

Handsome—Deliciously Spicy

We introduced this grand variety over 50 years ago and have been extensively developing and improving it ever since, so get your seed from us if you want genuine, true-to-type seed. Don't take anything "just as good." **Salzer's Early Bird** is of globe-shape, bright scarlet color, has very short tops, flesh is pure white, fine grained, crisp, nice, spicy taste, and never becomes hollow or pithy. Averages $\frac{1}{2}$ to 1 inch in diameter, according to maturity. It is alike most valuable for outdoor planting in spring or in autumn, and usually commands top prices.

Salzer's Early Bird, the incomparable radish, has produced radishes ready for the table in 18 days' time and less, radishes that were uniform in size and shape, uniform in maturity, with small tops and of beautiful and attractive bright red color. It is also one of the best strains for growing under glass.

Mr. Lester Kranich, R. D. 5, Box 110, West Bend, Wis., writes, "Your seeds are the best I have had and your **Early Bird Radish** can't be beat." Mrs. Gust Orth, R. D. 2, Box 108, Alpena, S. D., writes, "I like your **Early Bird Radish** very much indeed." Mrs. R. M. Corron, Wasco, Ill., writes, "Your **Early Bird Radishes** surely are fine. We found them the earliest and the best of any radishes that we planted." Mr. H. W. Lackey, R. D. 4, Box 10, Sioux Falls, So. Dak., writes, "Your seeds are certainly pleasing as to uniformity and trueness to type. Your **Early Bird Radishes** were particularly good."

If you are at all anxious, either as a market gardener or as a grower of Radishes for your own private table, to have Radishes from 3 to 10 days ahead of your neighbor, and if you are anxious to have the finest Radish that seed can produce, even under the most adverse circumstances, then by all means plant **Salzer's Early Bird**. Its crisp, brittle flavor, as well as its remarkably quick growth and fine color, alike recommend it.

975—Price of **Salzer's Early Bird Radish**: Pkg., 12c; oz., 19c; 2 oz., 35c; $\frac{1}{4}$ lb., 64c; $\frac{1}{2}$ lb., \$1.10; lb., \$1.95, postpaid. See also Page 57.

Blood Red Snow White Tipped Radish

An Exceptionally Fine Radish

The lively scarlet color points off to a pure white tip, giving it a most attractive appearance. It's perfection itself when it comes to quality and earliness! Splendid for forcing, also fine to plant as a succession variety. Radishes run uniform in both shape and size, averaging about $\frac{3}{4}$ inch in diameter. The skin is thin and tops are very short. The sparkling, snow white flesh is crisp, tender, fine grained and sweet. Does not become pithy or hollow. Matures in about 23 days.

972—Pkg., 10c; oz., 17c; 2 oz., 32c; $\frac{1}{4}$ lb., 57c; $\frac{1}{2}$ lb., \$1.00; lb., \$1.75, postpaid. See Page 57 for quantity prices.

Have been a satisfied customer for forty years of Salzer's seeds and plants of all kinds.—Mr. W. G. Keeney, Box 43, Long Creek, Ore.

FOR PEACE, AS FOR VICTORY

Grow Your Own GARDEN

Dear Friends:

Since sending you our last catalog, history aplenty has been made. Our country, the greatest in all the universe, will continue to hold its place in the world and grow in strength and prosperity, under God's guidance.

Your garden will be just as important this year as during the war years. There is no substitute for the fine, fresh flavor of your own garden products. We, who have gardened for many years have come to know this. Most of the folks who have planted gardens for the first time during the war have also come to know the full satisfaction of growing their own vegetables. We have received many letters from our patrons telling us about their successful gardens and the great pleasure they obtained growing food and flowers for their own use.

As a nation, we will be called upon again to supply food and other materials for the devastated peoples of the world. This demand is greater now that peace is here and will continue to grow until the destitute countries have time to rebuild their cities and restore their farms. Your garden is going to be necessary, if we are to meet the demands made upon us in the name of humanity.

Again we urge you to order early. While we expect to have most of our experienced employees back from the armed forces we want to give you the best of service and satisfy you in every way. During the past 78 years our efforts have all been directed to render service and satisfaction to our customers.

Salzer's seeds for 1946 are the finest we have ever offered. Only the choicest varieties have been selected, from the purest and healthiest stock plants. You will find new items, among old friends, in our plant section, both in house plants and perennials for outdoors. We hope you will enjoy them. Our policy has always been and still is—Satisfaction Guaranteed—or your money cheerfully refunded.

Thank you for your past orders. We sincerely hope we may serve you again and for many years to come. Now that Peace has come, plant for Prosperity.

Cordially yours,

Kenneth E. Salzer

Your seeds came through a dry spell to give us corn and peas when others had none.—Mrs. Richard Kuhn, Durand, Wisconsin

SALZER'S CLIFFWOOD EARLY WONDER WAX

The Sensation of Recent Years

Without question this is the most wonderful wax bean introduction of recent years, and the best for the market and the home garden. Belongs to the flat podded class and grows a strong plant eighteen inches high and two feet across. Plants are heavily loaded with pods five to seven inches long, flat, plump, meaty, and of a clear, handsome, waxy yellow color. Very tender, brittle, of fine texture and quality, and is the very earliest wax-podded bean. It is a bountiful yielder and bears for a long season; it is practically rustproof and it thrives and yields heavily in either a rainy season or in dry, hot weather. Appears to be absolutely unaffected by bad weather. Ready to pick in 35 days. If you have not as yet tried our New Early Wonder Wax, by all means give it a trial this season. You will not be sorry.

SELECT GOLDEN WAX

The standard flat wax-podded bean, and although it is not the earliest bush wax bean, yet it is so sure to produce heavy crops of large and attractive pods, that it is a great favorite all over with market gardeners. And if good for market gardeners, it is good for the home gardener. The pods are of large size, thick-flat, brittle, entirely free from strings, and the quality is excellent. Rich golden yellow, bushes about 10 in. high. It is rustproof, and yields well on all soils. Matures in 45 days.

SALZER'S NEW STRINGLESS KIDNEY WAX

Enormously Prolific, Stringless, Meaty and Tender.

This comparatively new variety, originated a few years ago by an Eastern grower, is a most valuable acquisition to the garden. Robust in growth, with long pods, entirely stringless, fleshy, and of superb quality. Plants are of erect bush habit, about 18 to 20 inches in height, and are most prolific. They are free from all diseases; even in wet seasons the foliage seems to be proof against blight, and the pods are always free from rust. Pods are fleshy, flattened in form, from 6 to 7 inches in length, $\frac{3}{8}$ inch thick, and $\frac{1}{2}$ inch broad, and of a rich lemon-yellow color. They are remarkable for their brittleness, exceptional flavor, and their absolute freedom from strings. Matures in 45 days.

Mr. Julius Hausser, Ogema, Wis., writes, "We like your Stringless Kidney Wax Beans among the best we ever had. Have sown Salzer's Seeds continuously since 1910."

SALZER'S GIANT BUSH LIMA

For Size and Flavor Has No Rival

Enormously productive and bears pods of immense size. Plants are of vigorous growth, with heavy foliage, and of true bush form, the full grown bushes measuring 30 inches in height and 24 inches across the top. Pods are frequently borne in "clusters" of from 5 to 8, are 5 to 6 inches long by 1 1/4 inches wide, and each one is well filled with large, thick, tender, full-size beans of melting and luscious flavor. It is very early, maturing in about 65 days. A universal favorite, because of its earliness, productiveness, size and fine flavor. Lima Beans should not be planted before the soil has warmed up and the weather is quite settled. Good for freezing. Pick when beans reach full size, but while still green and tender.

115—2 Oz. Pkg., 15c; 2 pkgs., 25c; 1/2 lb., 30c; lb., 48c; 2 lbs., 89c; 5 lbs., \$1.90, postpaid. See Page 57 for quantity prices.

**SALZER'S
GIANT BUSH LIMA**

SMALL BUSH OR SIEVA

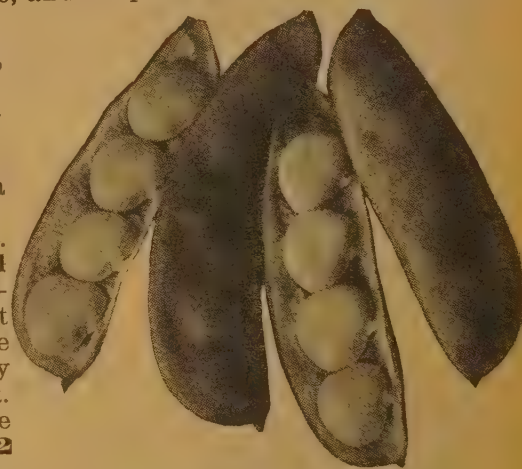

Is the smallest but most prolific of all the white seeded varieties, and as they are hardy and very early, are worth growing in the North. Matures in 70 to 78 days. Of true bush growth, the plants bear a tremendous lot of pods 3 inches long and filled with 3 or 4 light green, small, flat beans, of a sweet and delicious flavor. When mature, the beans are white, and keep well for winter shell beans.

116—2 Oz. Pkg., 8c; 2 pkgs., 14c; 1/2 lb., 24c; lb., 39c; 2 lbs., 70c; 5 lbs., \$1.45, postpaid.

One trial report shows plants holding up in 102 degree temperatures in the West, hence very valuable where the summers are hot. Very fine both for the market and the home gardener. 112—2 Oz. EDIBLE SOY BEANS

EDIBLE SOY BEANS are the food of the future! The tremendous food value of soy beans has long been known but the difficulty has been to develop a variety that would cook and bake soft so as to be edible. Edible Soy Beans are invaluable for making your own bean sprouts throughout the year.

The original seed was brought to the U. S. by Mr. Morse of the U. S. Dept. of Agriculture and was bred up and developed by Prof. Geo. M. Briggs of the University of Wisconsin and his associates. Matures in 85 days. Soy Beans are a substitute for meat; when green they are as good as fresh peas; cooked or baked, they taste somewhat like navy beans; roasted, they taste like peanuts. And they are of untold value for diabetics since they are low in starch! Fine for canning and freezing.

BANSEI—An early variety, plants 24 in. tall, pods many, 2 1/2 in. long, with 2 to 3 beans each, that cook and bake perfectly. Matures in 120 days. 4312—2 oz. Pkg., 7c; 2 pkgs., 12c; 1/2 lb., 19c; lb., 33c; 2 lbs., 59c; 5 lbs., \$1.15, postpaid. See Page 57 for quantity prices.

Baked Bansei Soy Beans

MENDOTA—A new edible soy bean, developed by Prof. O. B. Combs of the U. of Wis., 10 days earlier than Bansei, and cans and freezes perfectly! Plants 28 in. high, very prolific, disease resistant, high in vitamins, fine for sprouts. Cooks and bakes deliciously soft. 4313—2 Oz. Pkg., 10c; 2 pkgs., 17c; 1/2 lb., 24c; lb., 39c; 2 lbs., 70c; 5 lbs., \$1.45, postpaid.

ASPARAGUS

PARADISE ASPARAGUS

A sensational early Asparagus, producing a normal crop one year earlier than any other, and a heavier yielder. Crisp tender stalks, so large that 6 or 8 weigh one lb. Rust resistant. Paradise has been very popular out west and we recommend it to you, both for home and for market. Has a very fine, mild flavor. 1 yr. roots: 12 for 69c; 25 for \$1.25; 50 for \$2.30; 100 for \$4.25, postpaid. Not prepaid: 500 for \$14.35; 1,000 for \$27.50.

Rust-Proof Mary Washington

Mary Washington Asparagus has been bred to resist rust. It has thick and heavy shoots, long and straight, and closely folded tips and it is a beautiful rich dark green color, darker green at the tips. A very heavy yielder.

Set roots 4 inches deep and 18 inches apart in rows about 4 feet wide, fertilizing well with stable manure or other fertilizer. The richer the soil, the better the crop. Plant 100 roots to 15 by 20 foot bed. Two-year-old roots can be cut the following year.

One-year-old roots: 12 for 49c; 25 for 85c; 50 for \$1.55; 100 for \$2.85, postpaid. Not prepaid: 500 for \$10.45; 1,000 for \$19.00.

WORLD'S
FAIR

PRIZE
BEET

SALZER'S CHERRY BEET

We first offered Salzer's Cherry Beet in 1933, the memorable Chicago World's Fair year, as the Unknown Beet, and thousands planted it, to find it one of the nicest beets grown! Salzer's Cherry Beet is a small, early beet, maturing in 52 days and is especially fine for canning and pickling whole at 1¼ to 1½ inches in diameter. Roots are smooth, even in size and shape and almost perfectly globular. Tops and tap roots are very small. The flesh is an intense deep crimson, free from white zones, elegant in quality.

Yields heavily. While it is a splendid beet for canning, its attractive color and small uniform size make it ideal for daily table use. The flesh is so fine grained, so sweet and tasty, that it almost sets a new standard for beet quality! Fine for both home and market. 160—Pkg., 10c; oz., 23c; ¼ lb., 65c; ½ lb., \$1.19; lb., \$2.25, postpaid.

CROSBY'S EGYPTIAN

One of the most extensively grown of any variety of beets, by market gardeners. It is noted for its handsome form, small tops, very small tap-root, fine quality and quick, rapid growth. Roots

run uniform in size and shape, are rather flattened, turnip shaped, reach a good size, are tender and crisp. Flesh is an attractive dark red color with slightly lighter red zoning. Especially desirable for bunching for the early market. Takes on its turnip shape very early. Matures in 45 days. Also fine for the home gardener. We specialize in beet seed and we don't believe any better strains can be purchased.

153—Pkg., 9c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$1.95, post paid.

SALZER'S EARLY WONDER BEETS

Its beautiful deep blood-red color, nearly globe-shaped root with almost no lighter zoning in the cross-section of the root, its small sized top and its smooth, clean, and small tap-root makes it a decided asset in the beet family. Matures evenly so that the entire crop may be gathered at one time. It is a very rapid grower, is very quickly in presentable market shape, and because of its early maturity, it can be sown outside as late as July. Matures in 44 days.

177—Pkg., 5c; oz., 19c; ¼ lb., 57c; ½ lb., \$1.05; lb., \$1.90, postpaid.

Salzer's **GIANT FLAT DUTCH** Cabbage

The Grandest, Best Keeping, Surest Heading, Large Cabbage in the World

A Sure Header

For sureness in heading and regularity in growth, SALZER'S GIANT FLAT DUTCH heads the list! Heads are 12 to 14 inches in diameter, averaging 18 to 20 pounds in weight. It forms every time, very large, very hard, solid heads, crisp, tender, sweet, uniform in shape, color and handsome appearance. It has a very short stem, is a very compact grower, forms few loose leaves, which turn into the head and if planted closely will yield enormous crops. Reports of 999 marketable heads from 1,000 plants set out are of frequent occurrence. It keeps well until late in Spring and is good for shipping.

Always in Great Demand

On the city markets, the attractive, fine appearing heads sell themselves to thrifty purchasers. The home gardener who once plants this superb variety, finds it so far superior in every respect to any other late sort that he has ever tried, that where Salzer's Giant Flat Dutch has once been tried, it has never been supplanted by other varieties, but is sown year after year. Unsurpassed in quality and taste, sureness of heading, weight, size, attractiveness, far superior for sauerkraut and slaw. Once planted, always planted. Pronounced everywhere to be the greatest late flat cabbage ever introduced, and we believe it is the finest of any late cabbage in existence. 119 days.

Salzer's
Lightning

CABBAGE

SALZER'S LIGHTNING

Salzer's Lightning Cabbage is an extremely early cabbage, very valuable for the home garden, for the market gardener, and for shipping. The handsome heads are conical or pointed, and are usually about 8 inches long, about 6 inches thick near the base, and are firm and solid. The heads average 2½ pounds in weight, which is remarkable when one considers its earliness.

First introduced by us in 1889, Salzer's Lightning was pronounced by one and all the greatest addition for the past FIFTY YEARS to the cabbage family. Produces fine sized, marketable heads in 75 DAYS FROM SOWING OF THE SEED. Thousands of gardeners are now depending on our Lightning for their first early crop. It is very hardy, always sure to head and almost always the earliest in the market. The heads are blanching. The plants resist cold and are very hardy, are compact, have but very few outer leaves, can therefore be planted closely together and yield a large crop per acre.

OUR LIGHTNING is often ripe and solid when other sorts are still in leaves. We consider it without an equal in earliness, richness and deliciousness of flavor. No vegetable pays better than early cabbage. If you are a market gardener, you will want this; if you have a city garden, you cannot get along without it. If you wish the EARLIEST CABBAGE in the world, you must plant SALZER'S LIGHTNING.

Cabbage Plants in Two Inches of Snow

We Cannot Ship
Plants C.O.D.
Please Do Not
Ask Us To Do So.

Note: Due to the severe drouth in the South last spring, plants were not as nice as usual and could not be dug regularly, which delayed shipment of orders. We hope for normal weather this year again.

Frost Proof—That is exactly what we mean; in fact, we claim more than that. If the plants do not withstand twelve degrees below freezing (20 degrees above zero) we will either replace them or refund your money. Nor is that all, you can plant Salzer's Frost Proof Plants out in the open just as soon as you can get them into the soil. Once in the soil, the land freezing, or the plants being covered with ice, sleet or snow will do no injury, unless the temperature gets below 20 degrees above zero (frequently not then).

SPECIAL NOTICE

The plants when received may be somewhat wilted and have a stunted appearance. Regardless of appearance, they will produce results superior to common or home grown plants.

Be sure to state when we shall send your Cabbage Plants, otherwise we will use our own judgment. Shipping weight 15 lbs. per 1000 plants; 25 lbs. per crate of 2500. Plants direct from our growing station. Ready from January 15 to June 15. We cannot accept orders for 25 plants of one variety. No C.O.D. shipments.

**SALZER'S
EARLIEST
CORELESS**

**The Earliest,
Sweetest,
Most Tender,
and
Only Really
Coreless Carrot
Grown**

The peer of all carrots—the grandest carrot in cultivation! Market Gardeners, if you want highest, top-notch prices, you must plant Salzer's Earliest Coreless Carrot. Home Gardeners, if you want to have carrots that will be a real treat for your own table use, carrots that you will take pride in showing to your neighbor, you must plant Salzer's Earliest Coreless. A carrot that we think is in a class all by itself, and has been ever since it was introduced by us over forty years ago.

As in all else, Salzer's Earliest Coreless Carrot reigns supreme in the carrot world. Those who once plant it never discard this incomparable strain. Those who have never planted it, are missing a real treat. Our Earliest Coreless will demonstrate what splendid flavor, what tenderness, what attractive color, what lusciousness, what symmetry, can be bred into carrots. When planting seeds, the best is none too good. It is the cheapest in the end as everyone knows, and whenever you go out in the garden to get some carrots for dinner, you will be mighty glad that you planted Salzer's Earliest Coreless this spring.

It is a beautiful variety. It is exceptionally uniform in shape, of fine texture and entirely free of any heart and is very early, maturing about a week ahead of all other half long sorts, although fully as productive as any of them, the roots usually measuring 6 to 7 inches in length and 1½ inches through.

Salzer's Earliest Coreless in shape and color is one of the most handsome of Carrots. The roots are of cylindrical form, blunt at the end, very symmetrical, smooth skin, fine neck and small top. The color is a beautiful red, brighter and deeper than that of any other Carrot. It is a color that will draw the attention of the buyer on the market.

But the greatest feature of this fine variety is the entire absence of the stringy, coarse heart or core found in so many Carrots. It is of most delicious quality and owing to the fine texture of the red flesh and its tender, delicate flavor, Salzer's Earliest Coreless is called the sweetest of all Carrots by all those who have tasted it.

SALZER'S EARLIEST SUREHEAD

IT HEADS WHERE OTHERS FAIL

Grandest of all! Whether for forcing or open ground, planted early or late, it is the best, surest header of all. It is particularly desirable for forcing under glass. On our trial grounds every plant produced a **SUPERB HEAD AND SURPASSED ALL OTHER VARIETIES OF EQUAL SIZE IN EARLINESS AND QUALITY.**

The plants are of strong growth with erect, dark green, pointed leaves growing closely about the heads, which are pure snowy white, with very close and compact curds of wonderfully fine quality. The heads are of large size, often reaching 10 inches or more in diameter.

This sureness of heading is highly essential to the market gardener and just as necessary for the home gardener. To make the best heads, cauliflower plants need cool, moist weather, good soil and thorough cultivation. Salzer's Earliest Surehead matures in about 95 days and is a sure header.

317—Pkg., 15c; ¼ oz., 75c; ½ oz., \$1.40; 1 oz., \$2.70; 2 oz., \$5.00, postpaid.

328—Earliest Surehead Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain: Pkg., 20c; ¼ oz., 86c; ½ oz., \$1.60; 1 oz., \$3.00; 2 oz., \$5.65, postpaid.

Salzer's
Earliest
Surehead

SALZER'S FIRST CROP

A grand, distinct, extremely early variety. A splendid market gardener's variety, with stone-hard, snow-white heads.

Being of dwarf, compact growth, with but a small number of leaves, it is an ideal Cauliflower for forcing during winter and spring. Severe tests have proved it absolutely certain to head when conditions are ordinarily favorable, and also most uniform in growth, type and maturity, the crops being taken off almost clean at the first cutting. One characteristic of this novelty is the close sitting together of the leaves, enfolding the head tightly and causing the inner leaves almost to cover the flower, thereby avoiding the necessity of early tying up.

The heads are very beautiful, solid, snow white, of medium size, which will find a ready sale at the highest prices everywhere and will never fail to be appreciated.

321—Pkg., 12c; ¼ oz., 77c; ½ oz., \$1.42; 1 oz., \$2.75; 2 oz., \$5.25, postpaid.

First
Crop

DRY WEATHER OR DANISH GIANT

Produces stone-hard and snow-white heads, unsurpassed in quality, which average larger than those of the Salzer's Surehead, but are a week later. The foliage is very heavy, fully protecting the heads, which are less liable to blight in hot weather than those of the earlier sorts. As indicated by the name, for dry, hot climates it is to be preferred to all other sorts, being a sure header there when other sorts fail. Even in the driest weather, it is of a vigorous growth.

316—Pkg., 15c; ¼ oz., 69c; ½ oz., \$1.25; 1 oz., \$2.45; 2 oz., \$4.60, postpaid.

329—Danish Giant, Salzer's Cliffwood Farm, TRIPLE-A-TESTED—A special reselected strain: Pkg., 20c; ¼ oz., 80c; ½ oz., \$1.50; 1 oz., \$2.85; 2 oz., \$5.40, postpaid.

EARLY PARIS

Extremely early, dwarf, having fine white heads, solid and compact curds. Quality is good. This variety is a real bargain and remains very much in demand with our customers. 318—Pkg., 12c; ¼ oz., 68c; ½ oz., \$1.23; 1 oz., \$2.35; 2 oz., \$4.45, postpaid. 326—Early Paris, Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain certified by THREE-WAY tests: Pkg., 17c; ¼ oz., 79c; ½ oz., \$1.45; 1 oz., \$2.80; 2 oz., \$5.35, postpaid.

Celtuce

SALZER'S CELTUCE

The superb vegetable with a real taste thrill from the interior of China! The young leaves are eaten as lettuce and the matured stalks are peeled of their tough outer skin and the heart eaten either raw, or cooked. Celtuce is truly delicious, with a taste all of its own, perhaps slightly like celery, but different and milder.

Celtuce is really a distinct species of lettuce, but grows differently and has more uses. The young leaves are used as lettuce or cooked like spinach. As a raw vegetable, the stalks are peeled and cut into five-inch lengths and split lengthwise, chilled, and served like celery or raw carrots. Also delicious cooked like asparagus or in soups. Sow seed from early spring to July 1. The illustration shows one stalk cut lengthwise. 353—Pkg., 15c; 2 pkgs., 25c; ½ oz., 52c; oz., 99c; ¼ lb., \$3.65; lb., \$12.50, postpaid.

Salzer's Tampala

HUCKLEBERRY

Annual and is planted every year from seed. Bears a heavy crop of berries which are larger than the common Huckleberry or the Blueberries. Cooked with apples or a little lemon, they make fine jelly. Elegant for pies. They have a rather peculiar flavor, but are very much relished by many people. Thrives in all sections. 507—Pkg., 12c; ½ oz., 44c; oz., 75c, postpaid.

Salzer's Tastygreen
Healthful, Tasty, Superior to
Spinach and Other Greens.

TASTYGREEN

Tastygreen, the wonder vegetable, is rich in protein, mineral matter, and other elements so necessary to the development and maintenance of the human system. "Greens" are highly essential to our well-being, and of these, Spinach is perhaps the most widely planted and the most widely used, although unpalatable to many.

Tastygreen, the wonder vegetable, is far superior to Spinach or any of the other greens, and has a delicious flavor all its own, slightly and agreeably pungent with a Mustard taste when served hot, and when eaten raw, the flavor somewhat resembling raw Turnips. Tastygreen has small thin roots, about two inches long, and large oblong shaped leaves, rich dark green color, with a narrow white center rib. The leaves, stem and all, are prepared for table use in the same manner as Spinach or Turnip greens. It is very prolific and bears abundantly. The plants grow quickly and are ready to use in 21 to 23 days after planting.

1107—Pkg., 10c; oz., 24c; 2 oz., 44c; ¼ lb., 72c; ½ lb., \$1.35; lb., \$2.50, postpaid.

SALZER'S TAMPALA

An old Chinese vegetable, that produces its excellent greens in mid-summer, when spinach bolts to seed, and much finer than Swiss Chard. The leaves are cooked and served just like spinach.

Tampala retains its tenderness for a long time, in fact it requires only five minutes to cook. The branches 4 to 5 in long may be gathered instead of individual leaves and the young stem tips and leaves may be cooked together. Larger stems (as thick as one's finger) may be separated and cooked 10 minutes like asparagus. Or use Tampala in salads, instead of lettuce. Tasty flavor, high in food value, easily grown, and grows over a long period! 1110—Pkg., 15c; 2 pkgs., 25c; ¼ oz., 39c; oz., \$1.28; 2 oz., \$2.35; ¼ lb., \$4.40, postpaid.

SOW SALZER'S SEEDS

Salzer's Tastygreen is the most wonderful vegetable I have ever grown. Am eating some today, January 17, that escaped freezes.—Mr. E. R. Robinson, Lonoke, Ark.

CELERY

BETTER QUALITY-EARLIER

SALZER'S WONDERFUL

Also called Golden Plume! Earliest in maturity, superior eating quality, increased size, beautiful golden color, superior keeping qualities, marked resistance to rust and blight,—these are the outstanding characteristics of this superb celery.

Salzer's Wonderful produces fine stocky plants with large, broad, thick stalks that blanch easily and quickly to a beautiful clear waxen yellow. They are solid, crisp, brittle, tender, of a much superior flavor and quality, and are entirely free from stringiness of any kind. Trials at Cliffwood Farms prove it to be the very earliest celery. This extra earliness spells top prices from the early fall trade, for the trucker, and the earliest, most delicious, crisp and beautiful celery for the home gardener's table use.

Mr. R. R. Bockman, Box 236, Adell, Ill., writes, "Planted Salzer's Seeds for 38 years and still satisfied. Your Wonderful Celery is just fine in every respect."

The plants are remarkably resistant to blight and rust, a factor of great importance. Earliness, size, attractive color, shape, superior flavor, resistance to blight and rust!—the name WONDERFUL is about the only fitting one for this celery.

345—Pkg., 10c; ½ oz., 32c; oz., 55c; 2 oz., 99c; ¼ lb., \$1.87; ½ lb., \$3.60; lb., \$7.00, postpaid.

SALZER'S GOLDEN SELF-BLANCHING

The beautiful appearance of the plant, with its close habit, compact growth, and straight, vigorous stalks is indescribable. The ribs are thick, broad, fleshy and the hearts large and solid. As the plants mature, the inner stems and leaves turn to a beautiful golden yellow. Blanches easily, quickly, and perfectly.

Salzer's Golden Self-Blanching is a vigorous dwarf grower and very early. It is easy to cultivate and in every way a desirable variety. It is planted very extensively and owing to its handsome, waxen-yellow color, its superb quality, entire freedom from stringiness, crispness and tenderness and its delightful, rich, nutty flavor, this variety is most popular and the leading celery in many markets. The strain we handle is grown in the U. S., it is one of the finest in the market and produces plants uniform in growth and color with heavy, solid stalks.

333—Pkg., 15c; oz., 69c; 2 oz., \$1.20; ¼ lb., \$2.25; ½ lb., \$4.35; lb., \$8.50, postpaid.

SALZER'S SELF-BLANCHER

Thick Heavy Stalks, Beautiful, Silvery White Color

Salzer's Self-Blancher has been bred from the White Plume, over which it is a great improvement. It blanches more readily, is earlier, grows more stalks, is heavier and is a much better keeper than the old variety.

Next to Salzer's Wonderful it is the earliest celery that can be grown. We introduced Salzer's Self-Blancher a number of years ago and have kept on improving it year after year, and we believe that now it is more largely grown than any other self-blanching variety. Is of dwarf and compact habit, with light green foliage, stalks are thick and solid, unusually meaty, of a delicious rich flavor, pure white, heavy, tender and crisp. As it keeps so exceptionally well, it is widely grown for fall and winter use.

Many people who have never been able to grow celery before can grow this one to perfection, and succeed with it as well as with other vegetables.

The fruits are smooth, spineless, dark green, about 10 inches long and 3 inches thick, tapering slightly toward each end. Crisp white flesh, few seeds, and does well in practically all sections of the country. Retaining its deep green color for so long a period, makes it most desirable for both home and market. 474—Pkg., 15c; oz., 28c; 2 oz., 49c; ¼ lb., 83c; ½ lb., \$1.55; lb., \$3.00, postpaid.

Salzer's Improved Long Green is a medium late, slicing variety, also very good for pickling. Fruits are from ten to fifteen inches in length when fully matured, of somewhat slender girth, and of attractive dark green color, with spines or warts uniformly distributed on the surface. It produces early a fine quality of small cucumbers, excellent for pickling. Crisp, tender, and of good flavor. Matures in about 70 days.

It is very prolific and is characterized by a small seed cavity. Forces readily under glass.

EARLY FORTUNE

A superb type of White Spine Cucumber. It is early, very productive, disease resistant, and the fine grained, solid white flesh is remarkably crisp, with very few seeds. The handsome symmetrical fruits are nine inches long, beautiful, rich, dark green in color, and sell at sight at all markets. Color does not fade when shipped. 58 days.

SALZER'S EARLIEST LETTUCE

**EARLIEST CURLED OR LOOSE LEAVED LETTUCE.
DELICIOUSLY CRISP AND TENDER, EASIEST
TO GROW**

Yields an abundant crop of attractive light green leaves, heavily curled, of remarkably crisp texture, and of the finest flavor. The quality and flavor even of the outside leaves is fully equal to if not better than the tender heart leaves of many heading varieties. Salzer's Earliest is one of the most widely planted in all sections of the country, and especially in the great West. It is such a strong grower that it thrives everywhere.

It is an admirable variety for outdoor planting, especially in early spring and it is also most suitable for greenhouse forcing. It is the lettuce for planting all summer long. Extremely popular for winter markets. The lower leaves grow clear of the ground so that it rarely suffers from rot. It is an ideal shipper and will prove most profitable for the grower, whether he sows seed in a hotbed or out of doors. We consider it the best non-heading lettuce for the home garden. Salzer's Earliest Lettuce affords crisp, tender, attractive, finest quality leaves long before the heading sorts have commenced to close up.

540—Pkg., 15c; oz., 28c; ¼ lb., 82c; ½ lb., \$1.45; lb., \$2.75, postpaid.

WHITE SEEDED SIMPSON

Also known as Early Curled Simpson. A curled or crisp non-heading type, medium large, much crumpled leaves of a light green color. It is an early growing, hardy variety and is sure to give fine results even under unfavorable conditions. Tender, crisp and of excellent quality.

559—Pkg., 7c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$1.95, postpaid.

SALZER'S GRAND RAPIDS

Curled or crisp, non-heading, light green, leaves wavy, fringed and very curly, a good shipper. Very popular and widely grown.

541—Pkg., 5c; oz., 16c; ¼ lb., 47c; ½ lb., 85c; lb., \$1.50, postpaid.

BLACK SEEDED SIMPSON

One of the standard varieties. A non-heading, curled, bunching, crisp variety, attractive light green color. It reaches a large size, grows quickly, is early, of fine quality, tender and sweet, and thrives splendidly during the hot summer months. Easily grown by the home gardener and much used by market gardeners for hot bed culture.

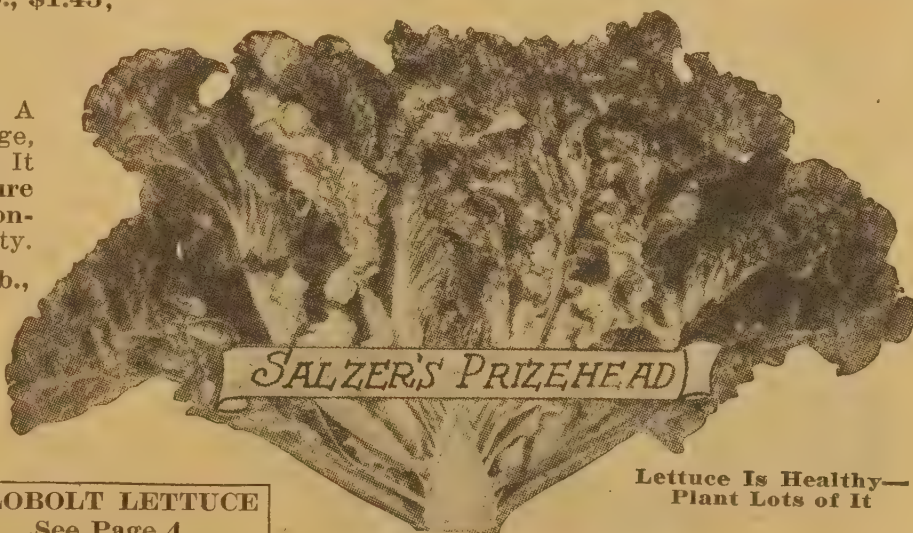

554—Pkg., 5c; oz., 20c; ¼ lb., 59c; ½ lb., \$1.10; lb., \$1.95, postpaid.

SALZER'S PRIZEHEAD LETTUCE

Is one of the best and most reliable varieties for all-year-around cultivation. The name is a trifle misleading, as it is a loose leaved or curled variety, and **does not make a head**. Plants form a loose cluster of leaves which are exceedingly tender, quite blistered and crumpled, sweet, crisp, and are of light brown color varying to a medium green base. Salzer's Prizehead reaches a very large size without losing its tenderness or crispness. 575—Pkg., 10c; oz., 18c; ¼ lb., 52c; ½ lb., 95c; lb., \$1.75, postpaid.

CLIFFWOOD SUMMER HEADER LETTUCE

CLIFFWOOD SUMMER HEADER

A superb head lettuce that we introduced in 1927, that forms solid heads despite hot weather, a thing which has hitherto been almost impossible. In tests on our Cliffwood Farms, practically every plant formed a fine, firm, solid head of butter-head lettuce of the finest flavor during the heat of summer.

The leaves are light green, crumpled, thick and tender, blanching to creamy white in the center of the head. NEW YORK OR WONDERFUL LETTUCE

A curled or crisp heading variety, large, dark green and slightly curled on the edges. It is the most extensively grown of any of the head lettuces by market gardeners, and it is likewise in much favor with home gardeners everywhere. The mature head is flattish globular, and has well folded leaves with the immediate outside leaves slightly incurved to protect the head from sunburn. The heads range from 16 to 18 inches in diameter and weigh from 3 to 3½ pounds each.

The heart is beautifully blanched, creamy white, crisp, tender, and free from any trace of bitterness. It is robust and is a standard hot weather variety. 565—Pkg., 10c; oz., 29c; ¼ lb., 88c; ½ lb., \$1.65; lb., \$3.10, postpaid.

547—New York or Wonderful, Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain certified by THREE-WAY tests: Pkg., 15c; oz., 37c; ¼ lb., \$1.14; ½ lb., \$2.10; lb., \$4.00, postpaid.

NEW YORK NO. 55 LETTUCE

Similar to the New York lettuce above, but the color is a brighter green and the head is somewhat better formed, and smoother. Resistant to tipburn and sure heading in warm weather. It is the surest heading strain of the New York type that we know of and practically every plant makes a good head even during hot weather. Considerably resistant to tip burn.

Heads are large, solid, crisp and attractive. New York No. 55 may also be sown late, sowings made about August 1 producing good heads up to heavy frosts. 568—Pkg., 15c; oz., 29c; ¼ lb., 88c; ½ lb., \$1.65; lb., \$3.10, postpaid.

SALZER'S BIG BOSTON

CREAMY HEART LETTUCE

A black-seeded cabbage head lettuce of the butter type, medium green color and of medium size. The head is firm and solid and the heart is a very rich cream color. It has a very firm, tender, buttery flavor, matures early, is slow to go to seed, and stands the heat of summer well.

It is much superior to many of the other butter types of lettuce, both in quality, earliness and ability to form sound, solid heads. Is considered a sure header. 579—Pkg., 9c; oz., 26c; 2 oz., 48c; ¼ lb., 77c; ½ lb., \$1.42; lb., \$2.75, postpaid.

SALZER'S ICEBERG LETTUCE

A most satisfactory crisp heading variety with curly leaves of light green tinged with brown on the edges. It forms a hard head of crisp tender quality, and blanches to a creamy whiteness. One of the best for the home garden and home market. 563—Pkg., 10c; oz., 29c; ¼ lb., 88c; ½ lb., \$1.65; lb., \$3.10, postpaid.

PARIS WHITE COS LETTUCE

Cos Lettuce is distinguished from other lettuce in that the leaves are elongated and somewhat spoon-shaped. It is grown exactly like other lettuce. When full grown, it forms a loose, conical head. Very crisp, tender, and has a delicious flavor. Succeeds very well everywhere, never wilts under the severest sun and can be grown to an immense size. 598—Pkg., 9c; oz., 24c; ¼ lb., 72c; ½ lb., \$1.34; lb., \$2.50, postpaid.

CHINESE OR CHICKEN LETTUCE

In this variety you will find a grand feed that yields more than other green feeds, and that is excellent for poultry. When cut, it grows rapidly again, and may be cut again and again. The yield is extremely heavy; grows 3 to 4 feet high and does not form a head. For table use, it perhaps will be found too coarse. 578—Pkg., 7c; oz., 20c; 2 oz., 37c; ¼ lb., 62c; ½ lb., \$1.18; lb., \$2.10, postpaid.

SALZER'S EARLIEST RIPE

10 CENTS Earliest of All.
PKG. Our attention was called to this

melon many years ago by a gardener near La Crosse, who had always had muskmelons from 8 to 15 days ahead of his neighbors. These Melons were of uniform size, of fine shape and appearance, yellow fleshed, extremely delicious, and sold readily in our markets at top prices.

SALZER'S EARLIEST RIPE IS THE EARLIEST YELLOW-FLESHED MUSKMELON that we know of, maturing in about 60 days. It is of oval shape, of good size, about five inches in diameter, with fairly distinct ribbing, heavily netted. The flesh is thick, of a rich salmon-yellow color, sweet, luscious and melting, and the flavor is unsurpassed by that of any other variety. The vines are robust and vigorous, resisting blight to a marked degree. You will like it. **606—Pkg., 10c; oz., 27c; ¼ lb., 80c; ½ lb., \$1.50; lb., \$2.85, postpaid.**

IDEAL FOR THE
HOME GARDENER

SALZER'S JUICY FRUIT

Salzer's Juicy Fruit, introduced by us
over fifteen years ago, is the grandest
salmon-fleshed melon in
cultivation today, it is
medium early, it is a
medium sweet, it is a
derfully sweet, it is a
heavy yielder, it is devoid of stringi-
ness, it is very meaty and it has a small
seed cavity.

Mr. R. G. Cusick, R. D. 1, Box 160,
East Stanwood, Wash., writes, "Your
Juicy Fruit Melons are unbeatable. I
have proven them in Eastern Oregon as
well as Western Washington."

The skin is an attractive light green, the
fruits reach a very large size, they are nearly
round with slight sutures, and the thick salmon
colored flesh is the sweetest, the most luscious,
the most sugary flavored, that we have ever
eaten. The melons are uniform in size and
pack nicely ten to a crate. This elegant melon
is ideal for the home gardener, and truckers
always find a heavy demand for the melons at
market.

Salzer's Delmonico Parsnip

Below—Salzer's Hollow Crown Parsnip

Salzer's **PARSNIPS**

DELMONICO

This nationally famous strain introduced by us, does not require such deep soil for its cultivation. It is a stump rooted variety and hence easily harvested. Roots reach a length of about 8 inches, with a thick broad shoulder, skin is smooth and white, and the flesh is fine-grained, sweet, sugary, tender and most excellent for table use. Very early, maturing in about 115 days. It is a most prolific yielder, it contains more saccharine, is sweeter, and more nutritious than other sorts, and as it is so easily harvested, large acreages are grown for stock feeding. Thrives on almost any soil. This splendid variety surpasses every other in yield and quality. **833—Pkg., 12c; oz., 27c; 2 oz., 49c; ¼ lb., 84c; ½ lb., \$1.50; lb., \$2.75, postpaid.**

IMPROVED GUERNSEY

Heavy yielder, smooth roots, flesh fine grained and of an excellent flavor. It is half-long, thick and short, and is easily dug. A dependable type. **834—Pkg., 10c; oz., 22c; 2 oz., 40c; ¼ lb., 67c; ½ lb., \$1.25; lb., \$2.25, postpaid.**

HOLLOW CROWN

Parsnips prefer very wet soil and will thrive where carrots will not grow. A freeze is required to sweeten them. For the best results, deep soil is needed.

Salzer's Hollow Crown is enormously productive, roots are 10 to 12 inches long and about 3 inches thick at the shoulder. It is rich in saccharine, has smooth white skin, is uniform in shape, is sweet, tender, sugary. Not only of fine table quality, but very desirable for stock feeding. Also relished by horses. Matures in 130 days. **832—Pkg., 10c; oz., 20c; 2 oz., 36c; ¼ lb., 62c; ½ lb., \$1.15; lb., \$1.95, postpaid.**

RHUBARB

SALZER'S MONARCH

See Index for Roots. **1053—Pkg., 10c; oz., 28c; ¼ lb., 85c; ½ lb., \$1.58; lb., \$2.95, postpaid.**

SALZER'S GIANT EXHIBITION

Huge Pods—Luscious Quality Peas

To those who wish huge podded peas, we suggest that they plant Salzer's Giant Exhibition. It is a late maturing kind. Is a wrinkled pea, very productive, the huge pods being well packed with peas, which, although large, are of a fine quality, sweet, sugary flavor and not tough as one would expect. The pods frequently grow to seven and even eight inches in length, depending of course somewhat on the soil, and it is not unusual to find between ten and twelve peas to the pod. The lateness of Salzer's Giant Exhibition is fully offset by its productiveness and its vigorousness. It has numerous first prizes to its credit, from various fairs, which accounts for its being named Exhibition. One of the best main crop varieties. Good for freezing.

Pods rather straight, with curve near end. Vines grow vigorously. Ready to use in about 85 days. 872—2 Oz. Pkg., 15c; 2 pkgs., 24c; ½ lb., 29c; 1 lb., 47c; 2 lbs., 87c; 5 lbs., \$1.85, postpaid.

A very early tomato, disease-resistant, developed by the late Fred J. Pritchard, Senior Physiologist of the U. S. Department of Agriculture. The large scarlet, almost globular fruits mature in 70 days, they do not crack, are very solid, with few seeds, and are of delicious flavor. Very productive. 70 days. 1162—Pkg., 10c; ½ oz., 35c; oz., 64c; 2 oz., \$1.15; ¼ lb., \$2.10, postpaid.

SALZER'S EARLIEST-OF-ALL TOMATO—See Inside Front Cover.

SCARLET TOPPER

This superb early variety produces an abundance of beautiful red fruits, smooth, meaty, globular in shape and with an elegant flavor. Scarlet Topper is enormously prolific and yields a heavy tonnage of tomatoes of large size. Vines are medium dense, erect, and SELF-TOPPING. The main shoot, after forming two or three-flower clusters, usually terminates in a flower cluster, checking vegetative growth much the same as cutting out the top, hence the name. 78 days. Fine for the home gardener. 1163—Pkg., 10c; oz., 49c; 2 oz., 90c; ¼ lb., \$1.65, postpaid.

Flesh thick, with comparatively few seeds and of sweet flavor. A good shipper. 75 days. 1114—Pkg., 10c; oz., 47c; 2 oz., 88c; ¼ lb., \$1.50, postpaid.

DWARF CHAMPION

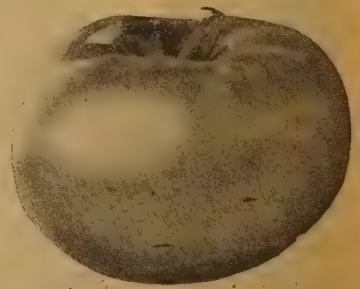

Quite distinct from other varieties in habit of growth and foliage. Good sort for the home garden as the plants, owing to their upright growth, take up but little room and yield abundantly. The plants stand up almost like small trees. Ripens early; of medium, uniform size; deep glossy red with purplish tinge; round, smooth, free from cracks. A very desirable sort. 80 days. 1156—Pkg., 10c; oz., 69c; 2 oz., \$1.20; ¼ lb., \$2.25, postpaid.

JUBILEE

A new pure orange to orange-yellow tomato that is entirely different from any yellow or orange tomato you ever grew. The fruits are bright golden orange, globular, thick, meaty, orange colored interior, flavor somewhat mild. Makes delicious juice of attractive color. Very high in Vitamins A and C. **SALZER'S
IMMENSE
FERRIS
WHEEL
TOMATO**

SALZER'S FERRIS WHEEL

The tomato is recognized by the medical profession as holding five points of merit which makes it actually indispensable in the vegetable garden. It is the richest of all foods in vitamins; it is the most wonderful and effective blood cleanser of all foods; it is the best of all vegetables for keeping the stomach and intestines in condition; it is an extraordinary tonic for the kidneys, and it is used widely in curing diabetes and Bright's disease. In addition, it is extremely valuable for feeding the juice to infants, accomplishing wonders in cleansing and building up the tiny stomachs. Every garden in the U.S. should contain at least a few tomato plants. Plant some this year!

Salzer's Ferris Wheel is of the large Ponderosa type and averages about 1 3/4 pounds in weight, although at Cliffwood Farms we have grown specimens weighing over 4 pounds.

Fruits have thick, solid, meaty flesh, which is of the finest quality, delicious, sub-acid flavor and very small seed cavity. The vines are strong and vigorous and easily bear their enormous weight of fruits which are of handsome appearance, smooth, and which have a rich, dark purplish-crimson skin. Salzer's Ferris Wheel has been continually developed for immense size, uniformity, flavor, productiveness and to resist any tendency to split. Matures in about 90 days. A grand tomato for the home gardener as well as for market gardeners. Mrs. Robert Mersch, 829 Dobson St., Evanston, Ill., writes, "Salzer's Ferris Wheel is the best tasting and the largest tomato we ever grew. Had a large yield." Mrs. Mike Kaminski, R.D. 3, Box 369, Thorp, Wis., writes, "I had grand success with your Ferris Wheel Tomatoes. We are very pleased with Salzer's Seeds."

1139—Pkg., 15c; 1/2 oz., 45c; oz., 85c; 2 oz., \$1.60; 1/4 lb., \$2.95, postpaid.

SALZER'S IMPROVED PONDEROSA

Rightly named "Ponderosa" because of the large size it attains. Fruit is very solid, with few seeds. Very often large tomatoes, from their very size, are rough and have a tendency to split, but we selected this seed so exhaustively that we have removed the roughness and splitting tendency as far as it is possible to do so.

Vines are vigorous and productive. Fruits large, oblong, purplish-red, with thin skin. Flesh is solid, with a very small seed cavity, making it a most desirable variety for slicing. To all who desire large size, solidity and flavor, we unhesitatingly recommend it. Requires about 85 days to mature. Mr. F. C. Litts, 36 Conklin St., Poughkeepsie, N. Y., writes, "I had exceptionally good results from Salzer's seed last year. The Ponderosa Tomatoes were just about perfect."

1142—Pkg., 10c; oz., 93c; 2 oz., \$1.75; 1/4 lb., \$3.25, postpaid.

1133—Improved Ponderosa, Salzer's Cliffwood Farm TRIPLE-A-TESTED seed: Pkg., 15c; oz., \$1.15; 2 oz., \$2.15; 1/4 lb., \$3.75, postpaid.

Salzer's Select Stone

King of the red tomatoes! The leading main crop variety, extensively grown by market gardeners, ideal for the home garden. Grown extensively by canners for tomato soup, etc. Best of all for tomato juice.

Vines are large, strong and productive. It is a smooth, large tomato, nice and solid, free from core and cavity. Nearly round in shape. The eating quality is exceptionally fine, has no superior for slicing or canning. Fruits are bright scarlet. Our strain of this variety is carefully grown, selected, rogued and cured. Matures in about 85 days.

1122—Pkg., 5c; oz., 44c; 2 oz., 82c; 1/4 lb., \$1.35, postpaid.

1132—Select Stone, Salzer's Cliffwood Farm TRIPLE-A-TESTED — A special reselected strain certified by THREE-WAY tests. Pkg., 10c; oz., 49c; 2 oz., 92c; 1/4 lb., \$1.65, postpaid. Tomato Plants, See Page 21.

Peak of Perfection

COLOR-TRU SEED—The seeds of this variety have been stained VIOLET to insure customers receiving true seed. Accept no other.

If it is size you want, and just a luscious, deliciously good, all around tomato, then you must plant Salzer's Peak of Perfection!

We gave free seeds of this tomato to our customers and friends in 1927 under the name of New Wonder and offered prizes for the largest tomato grown and for the best name for this beauty. Mr. Acro Castle, Hueysville, Ky., won the prize of \$25.00 cash for the largest tomato with a weight of 4 pounds 7 ounces. Think of a monster tomato like that! Mr. I. G. Haycroft, 7 East Washington St., Kensington, Md., writes, "I grew an enormous crop of smooth large tomatoes from your Peak of Perfection, so fine that they sold readily at \$1.50 per bushel." Mrs. Alfred Poertner, R.D. 2, Cedarburg, Wis., writes, "Your Peak of Perfection Tomatoes averaged 14 ounces each, and I expect to raise 5,000 plants this year. Also found them drought resistant."

Peak of Perfection is practically free from seeds. The tomatoes are of a beautiful appearance, uniformly large and smooth, with a rich dark crimson skin, meaty, and have a delicious, melting flavor. All esteem it the finest flavored tomato they have ever eaten. But combined with this delicious flavor is the enormous size! 90 days. 1131—Pkg. 17c; ½ oz. 49c; oz., 93c; 2 oz., \$1.75; ¼ lb., \$3.25, postpaid.

RUTGERS

Originated by Prof. Schermerhorn of the New Jersey Agricultural Experimental Station. Rutgers is outstanding for the large size and solid structure of the fruit! Skin is dark red, with thick outer and inner walls, very small seed cavities, and the interior color is a beautiful dark red.

Matures in about 85 days and the yield is very large, ripening an abundance of fruit even in the far northern climates, before the vines are killed by frost. It makes juice of low acidity and fine flavor and is a good canner, maintaining its firmness and deep red color when canned. Especially good for light sandy soils since the vines offer much protection for the fruit. Has yielded over 10 tons per acre! 1120—Pkg., 10c; ½ oz., 26c; oz., 47c; 2 oz., 88c; ¼ lb., \$1.50, postpaid.

MARGLOBE, DISEASE-RESISTANT

Marglobe is a cross between the Marvel and Globe tomatoes, developed by the U. S. Department of Agriculture, combining the second earliness of the former with the fine table quality of the latter. Marglobe is of fine scarlet color, globe shaped, of fine texture, deliciously mild in flavor, and wilt-resistant to a marked degree. Plants are of vigorous and heavy growth and very prolific. We have a record of one plant, on diseased soil, producing 107 large, fine round, best quality tomatoes. 80 days. Fine for tomato juice. Gives fine satisfaction in all sections. 1130—Pkg., 10c; ½ oz., 27c; oz., 47c; 2 oz., 88c; ¼ lb., \$1.59, postpaid.

MARKET GARDENERS' WHOLESALE PRICES

These low wholesale prices for large planters are for shipment not prepaid, by freight or express. If wanted by mail, please add extra for postage. Order early as some seeds are very short. It is also wise to order early because of railway congestion. We make no charge for bags or packing. Ceiling prices or lower on all seeds.

IMPORTANT NOTICE

Our Market Gardeners' Wholesale Prices apply only on an order totaling ten pounds or more of seed. That does not mean that you must buy ten pounds of any one variety, but a total, all told, of ten pounds or more of any seed, entitles you to the Market Gardeners' Wholesale Prices given on this special price list. Don't ask us to make a shipment of less than ten pounds at these prices, as we absolutely cannot do so, except in those cases where a second or third order is sent to us, and the first order was for at least ten pounds of seed.

SALZER'S OXHEART TOMATO

A very popular late variety, maturing in 90 days. The fruits are very large in size, often weighing one to two pounds each and even more, are purplish-pink in color, smooth, the shape of a beef heart, and with such a solid internal structure that there is very little room left for seed.

Oxheart is of very mild and sweet flavor which is preferred by many people to the more acid flavors. Is a choice tomato for salads, with its thick, delicious flesh! The flesh often shows an inch thick, without a single seed cavity. Receives its name from its shape, which is large at the stem end, tapering almost to a point. Vine growth is open and spreading, the fruits setting in clusters of 3 to 7.

1177—Pkg., 15c; ½ oz., 59c; oz., \$1.14; 2 oz., \$2.10; ¼ lb., \$3.75, postpaid.

SALZER'S NORTON WILT-RESISTANT

If you have been troubled with wilt, plant Norton Wilt-Resistant Tomato. Has yielded 300 bu. to the acre on soil affected by wilt, while other varieties next to it, yielded 25 bu. Is a mid-season tomato, globular, and of a beautiful scarlet color. Fine for tomato juice.

Culture

For pot culture, good drainage is essential. Customers have very fine results with ordinary good garden soil, but for the finest flowers, start the tubers in small pots or shallow boxes. Cover the bottom with one inch of peat or sphagnum moss, place the bulb on top, and cover with another layer of peat or moss. Keep moist with a temperature of 65°. When ready for repotting, well rotted manure may be added to the soil, and a cooler temperature maintained. Do not allow them to suffer for lack of water. Magic Mats (see Page 102) are good.

Outdoors, plant them 8 inches apart about the middle to the end of May in a moist shady location and do not let them suffer for lack of water. In fall, dig up bulbs before cold weather, dry, and store in sand in a cool place.

DOUBLE

Big, double balls of bloom, frequently measuring five inches in diameter! Both the double and the single Tuberous Begonia are very beautiful, and you will want some of each for either some shaded spot in your yard, or for pot culture.

We offer the same choice colors in the double form:

WHITE SCARLET YELLOW ROSE

Wilt-Resistant Asters

Loss of seedlings or transplanted plants, stunted, one-sided and off color plants in those that survive, dark colored streaks in the stem, yellowing of the upper leaves and death of the lower leaves are characteristics of Aster wilt or Aster stem-rot. The wilt organisms are capable of prolonged existence in one's soil and the only remedy is WILT-RESISTANT SEED.

This seed is practically immune to wilt and stem rot and produces flowers on soil upon which ordinary seed would not possibly grow. In one severe test, plants from this wilt-resistant seed grew splendidly while 93% from ordinary seed succumbed. We offer wilt-resistant seed of the following:

SALZER'S CALIFORNIA GIANT ASTERS

This marvelous type is the finest Aster in cultivation today, and commands the highest price at the cut-flower markets of all of our large cities. No less, does it make the best display of any Aster in the garden. Annual.

It is a cross between the Beauty Type of Aster and the Crego Aster, combining the vigorous tall growth of the former with the lovely, double, large flower of the latter. Salzer's California Giant is practically non-lateral, but instead, carries its blooms at the end of its long stems, without the small side branches, producing enormous flowers of wonderful substance on strong, stiff stems 20 to 24 inches long. The flowers measure 5 to 6 inches in diameter, with long petals that fluffily curl across each other and produce an exquisite bloom that has no equal.

Wherever exhibited, this superb Aster has won prizes and received awards of merit. Mrs. E. L. Watts, 1105 East 7th Ave., Corsicana, Texas, writes: "Your California Giant Asters were lovely. A local florist saw them and said they were larger than his own." Mr. Adolph Saladine, 113 E. Michigan St., Marquette, Michigan, writes: "We were very well pleased with your Asters last year."

The flowers themselves are very large, often measuring 3 inches across, and are produced in a beautiful variance of colors from deepest black to snow white. Myrtle R. Seiber, R.D. 2, Box 111, Iuka, Ill., writes: "Last spring I planted a packet of your Frost Proof Pansy Seed and they wintered through fine. The flowers are larger than any I have seen at the Greenhouses."

PINK DEAN KAY 'MUM

DEAN KAY CHRYSANTHEMUMS

Salzer's Dean Kay Chrysanthemums bloom very early — they frequently start flowering in July! These Dean Kay 'Mums have commenced blooming with us on July 20 and have continued their extravagant display until cut down by hard frost. One lady in Biloxi, Mississippi, wrote that Salzer's Dean Kay 'Mums started to bloom for her on May 20th and she expected to still have blooms on Christmas!

We know of no finer advance in recent years, than in these 'Mums! They resemble Salzer's Cushion 'Mums except that they make a distinctly larger bush and that they bloom earlier and continue to bloom much longer. They develop into plants about two feet high and with a three foot spread, and produce masses of bloom. They are also hardier, having weathered through unusually severe winters. And if anything, they bloom more profusely! Exceedingly fine for in front of shrubbery or for landscaping.

We offer five lovely colors:

Canary Dean Kay—Rich deep yellow semi-double flowers.

Mrs. D. H. Newland—Red above, yellow underside of petals, semi-double, very showy.

Orchid Dean Kay—Lovely clear orchid, large flowers, early, double.

Pink Dean Kay—Clear deep pink semi-double flowers.

Red Dean Kay—Brilliant crimson, double flowers, very striking.

Price: Any of above: Each, 58c; 3 for \$1.55; 5 (or 1 of each) for \$2.35; 6 for \$2.69; dozen, \$5.10, postpaid.

Shamrock. Produces an unbroken row of clean, attractive foliage about one foot high, and is particularly valuable for edging beds or walks. The leaves are shaped like shamrocks. Pink flowers, very freely borne. The blossoms close on dark, dull days and at night the clover-like leaves fold up. 3 for 14c; 6 for 25c; 12 for 47c; 25 for 87c; 50 for \$1.64; 100 for \$3.00, postpaid.

SUNRISE RASPBERRY

Concerning Sunrise, the U. S. Dept. of Agriculture says, "Of most importance to the practical grower perhaps, are the hardiness and resistance to disease of the plants, and the earliness and good size of the fruits, of Sunrise." Sunrise Raspberry

INDIAN SUMMER EVERBEARING RASPBERRY

Each year sees INDIAN SUMMER forging steadily to the front. The New York Fruit Testing Association considers this variety decidedly superior to other everbearing sorts in the trade.

The berries are large, conical, medium red, rather soft, good quality. The summer crop ripens early, beginning the last week of June. The autumn crop starts in September and continues until a severe frost. The bulk of the fall crop ripens in October.

The fall crop may not always ripen in northern sections but if it does not, the regular crop in June is well worth while. Since it ripens ahead of most red raspberries, it brings a fancy price on the market. This past season growers got \$6.00 a case on the Minneapolis market for most of their INDIAN SUMMER on account of its earliness.

For the best everbearing raspberry, plant INDIAN SUMMER. 1 yr. No. 1: Each, 30c; 3 for 72c; 6 for \$1.34; doz., \$2.40; 25 for \$4.35; 50 for \$8.45; 100 for \$16.50, postpaid. Cannot be sent to New Jersey.

The Best Barley for Malting Purposes.

Wisconsin Barbless or Wisconsin Pedigree No. 38 Barley is a bearded variety that was originated by the Wisconsin Experiment Station by crossing a smooth awn oat from Russia with Oderbrucker barley. It is a remarkably heavy yielder, with heavy, large and plump kernels.

The greatest feature of all, however, is the freedom from the troublesome awns in the beards. The smooth beards of Wisconsin Barbless Barley make it easier to handle and makes both the straw and the grain more valuable for feeding. It is six rowed, has very stiff straw and is resistant to disease. It is a big improvement over the rough bearded barleys. Resistant to stripe disease. Sow 1½ to 2 bu. per acre.

A Field of Salzer's Medium Red Clover

Medium Red, Mammoth, Alsike, Sweet Clovers Are Ceiling or Lower and Subject to Change with Ceiling. Other Seeds Subject to Change Without Notice.

CLOVER MEDIUM RED

Medium Red, the most important clover, lives two years or more, grows about two feet high and makes two crops a year, yielding about three tons of cured hay per acre. Clover hay is very nutritious, stock fed on it requiring less grain. Does well on a great variety of soils, thriving luxuriantly on strong, well drained loams. It is the best for crop rotations and increases succeeding crops from 25 to 60%. Sow 15 lbs. per acre. Our Radium Brand Clover is among the finest obtainable. It is our best grade, and tests around 99% in purity; the most of it is 99½% or better, and it is free from noxious weeds. Our Superior Brand tests about as high, free from noxious weeds, but it is not quite as fancy in appearance. Wisconsin and Minnesota grown. Bags free.

ROX SORGHUM

Rox Orange Sorghum is a superb variety of sweet sorghum developed at the Wisconsin Experiment Station. The original object in developing this strain was for syrup purposes, as an orange sorghum was needed that was sufficiently

early to mature in central and southern Wisconsin. The general characteristics are those of the orange sweet sorghums, and the special virtue of Rox Orange is that it matures early enough for Wisconsin growing seasons. It is about the best for sorghum syrup production and also makes a grand ensilage crop. 4349—2 lbs., 62c; 5 lbs., \$1.29; 10 lbs., \$2.25, postpaid to 4th zone. OATS

WHITE CROSS OR WISCONSIN PEDIGREE No. 19—A high yielding extra early white oat, with a taller straw and a larger kernel than is usually found in early oats. The tall straw is desirable in localities where the soil is light. A good rust-resister. Has a tendency to lodge on rich soils, but is well adapted to sandy soils. 4625—Prices above.

STATE'S PRIDE OR WISCONSIN PEDIGREE No. 7

Earliest yellow oat. In spite of unfavorable weather, State's Pride yielded 75.7 bushels per acre. Earliest of all yellow oats and best as a nurse crop and escapes rust, because of its earliness. Does not lodge easily, but fills out the kernels if it does, making it especially desirable for rich soils. Has a very short, stiff straw. It is a yellow oat, bright, thin hulled, meaty and is about the best oat. 4623—See prices above.

60-DAY, JULY OR KHERSON—It is a small, yellowish oat with a very thin hull and practically all meat, and with short, stiff straw. Does not lodge easily. Sixty Day Oats are extremely early and are especially fine in a dry season. They usually yield 70 to 80 bushels per acre, at least. It adapts itself readily to the different soils. Matures in about 80 days, rather than 60 as the name indicates. 4616—See prices above.

SALZER'S SILVERMINE—This variety is reputed for its heavy yields and is a fine second early white oat, very robust and vigorous and seldom lodges. The heads are borne low on strong, stiff straw which is unusually bright and clean. The kernels are white, plump, heavy and thin hulled. Endures extremes of dry, wet, hot and cold weather. 4615—Lb., 31c; peck, \$1.13, postpaid to 4th zone. Not prepaid: Peck, 75c; ½ bu., \$1.20; bu. VICLAND OATS—Vicland is an early yellow oat, very high in bushel weight, that has yielded over 85 bushels per acre, very resistant to rust and to smut!

On rich soil, the straw reaches a good height but on poor soil the straw is apt to be too short to cut with a binder. Vicland will stand in the shock a long time without germinating, which is most desirable in rainy weather. 4607—Price of Vicland Oats: Peck, 93c, postpaid to 4th zone. Not prepaid: Peck, 54c; ½ bu., \$9c; bu. (32 lbs.), \$1.55; 3 bu., \$4.50; 6 bu., \$8.75; 9 bu., \$12.85. Three bags (9 bu.) plants five acres. Certified Seed: 3 bu., \$6.85; 9 bu., \$19.95, not prepaid.

SALZER'S WHITE BONANZA White Bonanza is a heavy mid-season variety, extremely productive, with strong, stiff straw, bearing long heads filled with good-weight grain. It has demonstrated its ability to produce fine crops on sandy land and on the fertile prairie or clay loam soils. A dependable white oat that ripens in about ninety days. This variety is hardy, having been grown successfully in Canada, in sections about 1,000 miles northwest of La Crosse. "Bonanza" is our own Registered Trade Mark. 4614—Lb., 32c; peck, \$1.17, postpaid to 4th zone. Not prepaid: Peck, 79c; ½ bu., \$1.25; bu. REED'S CANARY GRASS

Or Phalaris. A grass for wet, low-lying, poorly drained soils—in fact, the only grass we know of for reclaiming waste, marshy lands.

The hay is a little coarse, especially if it is left to grow too long, but it is nutritious and tasty and all stock like it and relish it. Underground stems will form a tough sod and hold hay machinery. Yields up to 4.57 tons of hay per acre from two cuttings. Cut the first crop for hay as soon as the heads or panicles appear.

Broadcast 5 to 6 lbs. per acre or drill in ½ in. deep, 2 to 3 lbs. in 18 in. rows. If covered with water, wait till the water recedes and then sow. 4511—Radium Brand—Lb., 87c; 2 lbs., \$1.58; 5 lbs., \$3.69, postpaid to 4th zone. Not prepaid: 10 lbs., \$6.45; 25 lbs., \$15.85; 50 lbs., \$30.75; 100 lbs., \$59.75.

Salzer's Timothy

SALZER'S BILLION DOLLAR GRASS (Panicum Crusgalli)

Especially Valuable for Silo and for Feeding Green—A Substitute For Corn Fodder
Green Feed on August 1st

Salzer's Billion Dollar Grass furnishes a heavy amount of desirable green feed during August! Sown about the end of May, the fodder will be ready to cut about August 1st or a little earlier! Begin to cut it before it blossoms and continue to cut for about 12 days or until the stems toughen. By making a second seeding about June 10 and a third about June 25, abundant green feed may be had during all of August and with later seedings, into September!

Salzer's Billion Dollar Grass gives a heavy yield of green fodder, from 12 to 18 tons per acre on naturally moisture-retentive land in good condition, but heavier yields of up to 35 tons per acre have been reported. Yields anywhere up to 60 bushel of seed per acre (32 lbs. per bu.), although 90 bushel of seed per acre have been reported, and it yields from 3 to 6 tons of hay per acre.

A Quick Producer

Salzer's Billion Dollar Grass produces green feed, and plenty of it, in about nine or ten weeks and attains the height of four to seven feet according to the richness of the soil. It is the one grass to sow if you want plenty of green feed during August and September for your cattle, horses, sheep, hogs and poultry. Up to 90 bushel (3,150 lbs.) of seed per acre! Hogs, poultry, geese and turkeys relish the green feed and thrive and fatten if fed the seed during the fall and winter months.

By cutting as soon as the plants come into bloom, a second crop may often be had and the yield of forage materially increased. When grown for seed, it gives only the one crop and sometimes some pasture thereafter.

Salzer's Billion Dollar Grass gives 3 to 6 tons hay per acre but as it is rather coarse and succulent it is difficult to cure for hay and we do not recommend it for that purpose. Since it is difficult to dry, the hay may become musty and so one cannot depend upon a large amount of dry hay. However, if the weather allows several extra hay days to follow one another, it is successfully cured in small cocks as clover is often cured.

Use Salzer's Billion Dollar Grass as silage in place of corn wherever it is not possible or convenient to grow corn. It is a wonderful "catch crop" whenever the corn has been destroyed by hail or otherwise.

Where It Grows

It grows best on a soil that is rather retentive of moisture and quite rich. It luxuriates on a low, rich, moist situation but it also does well on higher ground. When it is sown on retentive soil, it endures drought fairly well. On the rich soils of the West and Northwest where there is sufficient moisture, or where there is irrigation, it yields heavily and it has given good yields on the alkali soil so common in parts of the West. In the Mississippi Valley, it yields abundantly.

When a Cold Wet Spring

floods out your corn or damages other crops, Salzer's Billion Dollar Grass is an ideal catch crop. We have had customers plant it as late as the middle of August, as a catch crop, but to get best results, we recommend planting it up to July 1 or possibly July 15. You will find

Salzer's Billion Dollar Grass

Billion Dollar Grass of great value in case of a crop failure of clover and timothy in a dry spring.

It Is Productive

Under average conditions of moisture and fertility of the soil, Salzer's Billion Dollar Grass is one of the most productive of the annual hay grasses. Think of yields of up to 20 tons of fresh green feed per acre, up to 6 tons of cured hay per acre, or up to 3,000 pounds of seed per acre! Its biggest and its greatest value, however, is in its green fodder and in its silage.

Feeding Green

Salzer's Billion Dollar Grass cut from day to day and fed green to cows, is much relished. Cows invariably increase in milk when green Billion Dollar Grass is alternated with corn fodder.

Fed continuously and alone, Billion Dollar Grass acts as a laxative and a diuretic, and the ideal feeding is about 10 pounds hay per day plus about 50 pounds green Billion Dollar Grass per day.

For Silage

Over 18 tons ensilage per acre! Billion Dollar Grass is not as nutritive as corn-silage, yet it makes a very fine silage and makes a fine substitute if the corn crop fails or if corn cannot be grown. For ensilage, cut in late bloom or when the seed is beginning to form. If cut after it has ripened its seed, it will then be too dry and tough. Filling the silo with two parts by weight of Salzer's Billion Dollar Grass and one part of Soy Beans makes a very superior silage.

What It Is

Panicum Crusgalli is a Japanese Millet and was given the name Barnyard Millet in 1896 by Prof. W. P. Brooks of the Hatch (Mass.) Station. In 1901, we first offered it to the public and gave it the name Billion Dollar Grass because of its tremendous yield of fodder and seed, and it is probably more widely known to-day under this name than any other. It is not poisonous at any stage of growth and is distinct from Sudan Grass.

Culture

Salzer's Billion Dollar Grass is a tender annual and should not be sown before corn planting time as it does not stand frost. Sow about 20 pounds per acre broadcast, covering about 1/4 inch deep. May be sown up to July 1 and even up to the end of July.

PASTURE—All rich, luxuriant grasses should be pastured moderately at first. Therefore, you should turn in your hogs, cattle, sheep, and horses the first few times only after they have had a good feed elsewhere and thus accustom them to it. It is on the same plan as hungry stock turned the first time into a field of rich clover—they might find harm. Turn them into Billion Dollar Grass moderately at first and you can soon permanently.

FOR HAY—Cut when the plant is in early bloom. Cut with a mower and allow it to cure in the swath for a day; then rake into windrows and when sufficiently cured, put it into cocks for about a week.

FEEDING GREEN—Begin to cut before it blossoms and continue until the cattle do not eat all of the stems.

FOR SEED—Let Salzer's Billion Dollar Grass get thoroughly ripe and cut and thresh as you would Timothy. The seed is about equal to oats in composition, that is in protein and fat.

SALZER'S EARLY SIX WEEKS POTATOES

We are nationally known as the largest retail seed potato house in the country, and we probably handle more potatoes than any other company. Our seed is grown in the fertile Eagle Valley and Red River Valley of Northern Minnesota, two districts which have not as yet been surpassed for quality seed. Prices should not be judged by the price of eating potatoes. Our potatoes are grown primarily for seed purposes and all of them are U. S. Gov't. Grade No. 1. We believe you will be well pleased with them. U. S. Grade No. 1 requires that the potatoes be practically free from scab, blight, dry rot and damage caused by disease, and be graded to a minimum size of 1 1/2 inches. 60 lbs. in one bushel.

Salzer's Early Six Weeks stands alone as the great earliest general purpose Potato! It is ahead of Salzer's Earliest in quality and yield, although not quite so early, but is 10 days earlier than the famous Early Ohio Potato. There is another great advantage in planting Salzer's

Early Six Weeks Potatoes and that is that it has never failed to produce a good crop of extremely early, very large tubers.

Salzer's Early Six Weeks is fit for market everywhere in six to eight weeks. It is good for midsummer, good for late summer, good for fall, and magnificent to put into winter quarters, where it will keep splendidly and give you the finest flavored, best quality eating Potatoes imaginable. If we had but one Potato to plant, this would be the Potato every time.

Skin is pink and smooth. The flesh is white and cooks mealy. Round to oblong in shape. Salzer's Early Six Weeks Potato is one of the best market varieties for all sections of the country. Please give date we shall ship your potatoes. Price of Salzer's Early Six Weeks: U. S. No. 1: 2 lbs., 34c; 5 lbs., 64c, postpaid to 4th zone. Not prepaid: Peck, 85c; 1/2 bu., \$1.55; bu. About the best late potato for Wisconsin, and equally good for other states. It is not a good yielder on poor, sandy soil, but on fertile soil it yields heavily, it is of high quality, it cooks white, seldom shows hollow heart or internal discoloration and hardening, and it is resistant to yellow dwarf disease and to the late blight which causes a form of tuber rot.

Sebago potatoes are white, thin skinned, shallow eyed, and oval to oblong in shape. The vines are large and vigorous, of upright habit. During hot weather it may roll its leaves but this has no connection with the Leaf Roll Disease. U. S. No. 1: 2 lbs., 32c; 5 lbs., 60c, postpaid to 4th zone. SHADY PLACE MIXTURE

Not all grasses are grown successfully in shade or partial shade, and we have therefore prepared this mixture of fine leaved grasses that are naturally adapted for this purpose. We recommend sowing early in Spring, if possible before the ground is shaded to any great extent, using one pound to 150 square feet. If the ground has been densely shaded and is sour, it is well to apply some slaked lime as well as commercial fertilizer. Use 1 lb. to 150 square feet. Contains no timothy. **4527**— $\frac{1}{2}$ lb., 44c; lb., 79c; 2 lbs., \$1.48; 5 lbs., \$3.60, postpaid. Not prepaid: 10 lbs., \$6.55; 25 lbs., \$15.85; 100 lbs., \$62.00.

Loads Of Flowers

We have counted 500 buds and flowers on one two year old plant! Think of it—up to 500 blooms on one single plant. Each plant, the first year, produces such loads of gorgeous flowers that passersby will look at it in wonder!

Easily Grown

Salzer's Hardy Cushion 'Mums are easily grown. The plants grow about 18 inches high and spread out 2 to 2½ feet, forming a lovely and striking, dense and compact mound. Plant them about 2 feet apart. They are literally covered with flowers which last over a long period. Give them a handful of fertilizer twice a year.

A Sensation of Color and Beauty

You may plant Salzer's Hardy Cushion Chrysanthemums anywhere in the garden with most pleasing effect, on each side of a steps, along the foundation of the house, in the lawn, in solid beds, or as a border along the boundary line, or to line driveways or walks! They grow rapidly, forming large, round, compact bushes completely covered with simply hundreds of full, double, perfect Chrysanthemum blooms from about the middle of August until frost.

We offer **YELLOW CUSHION**, deep yellow; **PINK CUSHION**, light pink; **BRONZE CUSHION**, deep bronze; **RED CUSHION**, deep red flowers; **PYGMY GOLD CUSHION**, yellow shading to bronze; **WHITE CUSHION**, pure white. State kind wanted.
